

PURPOSE OF THE FOUNDATION

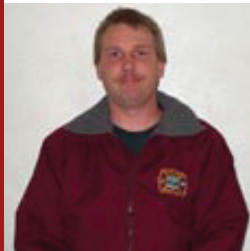

Although accidents will happen and firefighters will lose their lives in the line of duty, the goal of our foundation is to have a resource available for the men and women of the fire service to better prepare themselves for the dangers of their job. Throughout the Northwest, firefighters are going untrained due to lack of funding. This is unacceptable. By offering scholarships for educational seminars, instructional teachings, and training materials, it is our hope to equip as many firefighters as possible, helping to reduce the unnecessary injuries and deaths in the fire service.

HISTORY OF THE FOUNDATION

On November 25th of 2002, the community of Coos Bay, Oregon suffered a tragic loss when three of their local firefighters lost their lives in the line of duty. Randy Carpenter, Jeff Common, and Chuck Hanners all gave their lives as heroes serving their community while fighting a fire in an auto parts store. After the roof of the auto parts store collapsed, the fire had been extinguished, and the smoke cleared, three families and a community mourned their great loss. Of course, as with any accident, many questions arose. Most asked without answer. Was there something that could have been done to prevent this horrible event?

In response, the family and friends of Randy Carpenter have established a foundation in memory of their son, brother, father, uncle and friend. Everything we do is done with the hopes of helping to prevent future tragic losses of firefighter's lives. Randy believed strongly in training and would often state, "Preparation is the separation between a good firefighter and the best!"

Continuing in his belief, the Randy Carpenter Memorial Foundation is dedicated to the education and preparation of firefighters everywhere.
